Experiment 6: Handoff Simulation in Mobile Networks Using Figma

Aim: To simulate a handoff scenario in a mobile network and visualize the process using Figma.

Procedure:

1. Open Figma and create a new design file.
2. Select the Frame tool and create a suitable frame.
3. Add the title “Mobile Network Handoff Process”.
4. Draw two neighboring cells with Base Station 1 and Base Station 2.
5. Add a mobile phone moving from Cell 1 toward Cell 2.
6. Use arrows to show the mobile device's movement between the two cells.
7. Illustrate signal strength decreasing from Base Station 1 and increasing toward Base Station 2.
8. Use different colors to distinguish the old and new connections.
9. Review the design, add labels, and save or export the file.

Output:

Result: A mobile network handoff scenario was visualized using Figma was successfully designed using Figma.
