Experiment 11: Secure Mobile Application Wireframe Using Figma

Aim: To design a mobile application wireframe incorporating essential security measures using Figma.

Procedure:

1. Open Figma and create a new design file.
2. Create a mobile-sized frame.
3. Design a login screen with email and password fields.
4. Add login, forgot password, and biometric authentication options.
5. Create a security settings screen with two-factor authentication and privacy controls.
6. Add security icons, buttons, and suitable colours.
7. Save it

Output:

Result: The secure mobile application wireframe was successfully designed using Figma.
